

Rabiah Khanum

Technical Writer & Documentation Engineer

+92 315 8217968 | khanumrabiah@gmail.com | Islamabad, Pakistan | linkedin.com/in/rabiahkhanum2049

PROFESSIONAL OVERVIEW

Electrical Engineer turned Documentation Engineer specializing in docs-as-code workflows, automation, and AI-ready documentation for SaaS and engineering teams. Built Python pipelines cutting build time from hours to minutes, managed 2 simultaneous client accounts, and conducted primary research with 70+ technical writers across the US and Europe. Currently advancing API documentation expertise through various hands-on exercises.

WORK EXPERIENCE

Technical Writer | Xgrid.co (Hybrid, Islamabad)

Dec 2024 – June 2026

- **Engineered a Python docs-as-code pipeline** using the open-source rstdoc library and GitHub Actions, cutting build time from hours to minutes and eliminating manual RST file creation across the full content lifecycle.
- **Built live interactive features** inside client documentation: a Python feedback button routing reader input to Jira via Slack webhooks, and a JavaScript/CSS copy-link button embedded in RST troubleshooting tables for instant cross-team alert sharing.
- **Restructured documentation for AI chatbot readability** by implementing metadata layers, structured summaries, and conclusion sections; independently researched Neo4j knowledge graphs and Sphinx meta directives for stronger information retrieval.
- **Built automation workflows** using Zapier, Apollo, Clay, and Apify: 25+ prospect research lists (200–5,000 contacts each), automated Slack/email notification pipelines, and campaign and audit documentation.
- **Customized client-facing Sphinx themes** using HTML, CSS, and JavaScript, delivering branded developer portals aligned to client standards.
- **Managed client-facing documentation** across 2 simultaneous client accounts (cloud networking and data analytics) within weekly sprint cycles and zero-error-margin standards.
- **Contributed to the full SDLC** gathering requirements, supporting sprint planning, writing release documentation, and publishing post-release updates.
- **Produced 10-15 internal onboarding guides** across Power BI, Tableau, and HubSpot, and 4–5 executive pitch decks for client summits.
- **Conducted primary industry research** via 71 survey responses and 7 video interviews with senior technical writers across the US and Europe on AI adoption in documentation.

Technical Writer Intern | Xgrid.co (Hybrid, Islamabad)

Sep 2024 – Dec 2024

- **Authored developer-facing documentation** for a US-based cloud networking client using Sphinx, reStructuredText, and GitHub within a docs-as-code workflow, delivering iterative updates aligned with weekly engineering sprints
- **Documented Cisco PoC tools and cEdge networking solutions**, translating complex networking concepts including routing, switching, TCP/IP, and VPN configurations into clear, task-oriented technical content
- **Managed direct client communication** with a US-based cloud networking team across weekly sprint meetings, triaging open documentation tickets, and realigning deliverables with real-time engineering changes
- **Created architecture diagrams and process flowcharts** using Draw.io to support technical documentation and stakeholder presentations

IP Core Intern | Pakistan Telecommunication Company Ltd. (PTCL) (On-site, Islamabad) *July 2023 – Sep 2023*

- **Gained hands-on experience** with the OSI model, TCP/IP stack, IPv4/IPv6, subnetting, and core ISP operations, building domain knowledge directly applicable to cloud networking documentation
- **Designed and tested virtual network topologies** and core services, including DHCP, DNS, routing, and switching, in lab environments
- **Documented network workflows, configurations, and troubleshooting scenarios**, developing the technical depth needed to write accurately for engineering audiences

EDUCATION

BSc. Electrical Engineering

Aug 2020 – July 2024

University of Engineering and Technology Taxila (UETT), Pakistan

CGPA: 3.31/4.00 · EQF Level 6

CERTIFICATIONS & TRAININGS

Authoring API Documentation — Postman Academy

June 2026

API Documentation Path — Postman Academy

June 2026

Building Knowledge Graphs with LLMs — Neo4j Graph Academy

Feb 2026

AI Fluency: Framework & Foundations — Anthropic Education

Jan 2026

Network Addressing and Troubleshooting — Cisco Networking Academy

May 2025

Aspire Leaders Program — Aspire Institute, Harvard Initiative

Nov 2024

Microsoft Azure Course — Great Learning Academy

Aug 2024

Seeds for the Future: Cloud Computing — Huawei

Aug 2024

Networking Basics — Cisco Networking Academy

June 2024

TECHNICAL SKILLS

- **Documentation & APIs:** Sphinx (reStructuredText), Confluence, Docs-as-Code, GitHub, Visual Studio Code, Astro, MDX, API Documentation (Postman, REST, endpoints, parameters), Draw.io, LucidChart, Microsoft Suite, Canva
- **Automation & Web:** Python, GitHub Actions, n8n, HTML, CSS, JavaScript, Zapier, Apollo, Clay, Apify, Markdown, YAML
- **Domain Knowledge:** Cloud Infrastructure (Multi-cloud Networking, Azure VNets, Load Balancing, AWS, GCP), Networking (TCP/IP, IPv4/IPv6, Routing & Switching, DNS, DHCP, Subnetting), AI & Documentation (Knowledge Graphs/Neo4j, LLMs, AI-assisted workflows)
