

RABIAH KHANUM

TECHNICAL WRITER & DOCUMENTATION ENGINEER

EDUCATION

- **BSc. Electrical Engineering (Aug 2020 – July 2024)**
 - CGPA: **3.31/4.00**
 - EQF level 6
 - University of Engineering and Technology Taxila, Pakistan (UETT)*
- **Intermediate (Pre-Engineering) (2018 - 2020)**
 - Grade: **A (87.64%)**
 - EQF level 3
 - Army Public School and College, Kharian Cantt, Pakistan*
- **Matriculation (Science) (2016 - 2018)**
 - Grade: **A (94.64%)**
 - EQF level 6
 - Army Public School and College, Kharian Cantt, Pakistan*

PROFILE

Electrical Engineer turned Documentation Engineer specializing in docs-as-code workflows, automation, and AI-ready documentation for SaaS and cloud companies. Built Python pipelines cutting build time from days to minutes, managed 2 simultaneous client accounts, and conducted primary research with 70+ technical writers across the US and Europe. Currently advancing API documentation expertise through Postman's API Documentation Path.

- **YouTube Interviews:**
[Interview with Senior Technical Writer from Serbia](#)
[Interview with Diana from Technical Writing Uncensored](#)

SOFT SKILLS

- Cross-functional collaboration with engineers, clients, and SMEs
- Analytical thinking applied to complex technical systems
- Clear communication across technical and non-technical audiences

LANGUAGES

- **English:** Full professional proficiency (*IELTS Band: 8*)
- **Finnish:** Elementary proficiency
- **Urdu:** Native or bilingual proficiency

WORK EXPERIENCE

Technical Writer, [Xgrid.co](#) (Dec 2024 – Ongoing)

- Engineered a Python Docs-as-Code pipeline using an open-source Python library (rstdoc) and GitHub Actions, cutting build time from **days to minutes** and eliminating manual RST file creation across the full content lifecycle
- Built live interactive features inside client documentation: a Python feedback button routing reader input to Jira via Slack webhooks, and a JavaScript/CSS copy-link button embedded in RST troubleshooting tables for instant cross-team alert sharing
- Restructured documentation for AI chatbot readability by implementing metadata layers, structured summaries, and conclusion sections; independently researched Neo4j knowledge graphs and Sphinx meta directives for stronger information retrieval
- Customized client-facing Sphinx themes using HTML, CSS, and JavaScript, delivering branded developer portals aligned to client standards
- Managed documentation across **2** simultaneous client accounts, cloud networking and data analytics, within weekly sprint cycles and zero-error-margin standards
- Produced **10–15** internal onboarding guides across Power BI, Tableau, and HubSpot, and **4–5** executive pitch decks for client summits
- Built automation workflows using Zapier, Apollo, Clay, and Apify: **25+** prospect research lists (**200–5,000** contacts each), automated Slack/email notification pipelines, and campaign and audit documentation
- Conducted primary industry research via **71** survey responses and **7** video interviews with senior technical writers across the US and Europe on AI adoption in documentation
- Actively participated in the full SDLC: requirements gathering, sprint planning, release documentation, and post-release updates

Technical Writer Intern, [Xgrid.co](#) (Sep 2024 – Dec 2024)

- Authored developer-facing documentation for a US-based cloud networking client using Sphinx, reStructuredText, and GitHub within a docs-as-code workflow, delivering iterative updates aligned with weekly engineering sprints
- Documented Cisco PoC tools and cEdge networking solutions, translating complex networking concepts including routing, switching, TCP/IP, and VPN configurations into clear, task-oriented technical content
- Managed direct client communication with a US-based cloud networking team across weekly sprint meetings, triaging open documentation tickets and realigning deliverables with real-time engineering changes
- Created architecture diagrams and process flowcharts using Draw.io to support technical documentation and stakeholder presentations

- **Punjabi:** Native or bilingual proficiency

INTERESTS

- Reading Fiction (200+ books read) – curiosity, storytelling sensibility, language depth
- Arabic & English Calligraphy – precision and attention to detail

IP Core Intern, Pakistan Telecommunication Company Ltd. (July 2023 – Sep 2023)

- Gained hands-on experience with OSI model, TCP/IP stack, IPv4/IPv6, subnetting, and core ISP operations, building domain knowledge directly applicable to cloud networking documentation
- Designed and tested virtual network topologies and core services including DHCP, DNS, routing, and switching in lab environments
- Documented network workflows, configurations, and troubleshooting scenarios, developing the technical depth needed to write accurately for engineering audiences

CERTIFICATE & TRAININGS

- API Documentation Path course: Postman Academy – *Ongoing*
- Building Knowledge Graphs with LLMs: Neo4j Graph Academy – *Feb 2026*
- AI Fluency: Framework & Foundations: Anthropic Education – *Jan 2026*
- Network Addressing and Troubleshooting: Cisco Networking Academy – *May, 2025*
- Aspire Leaders Program: Aspire Institute, Harvard Initiative – *Nov 2024*
- Microsoft Azure Course: Great Learning Academy – *Aug 2024*
- Huawei Seeds for the Future Course on Cloud Computing – *Aug 2024*
- Networking Basics: Cisco Networking Academy – *June 2024*

TECHNICAL EXPERTISE

- **Documentation & APIs**
 - Sphinx (reStructuredText) · Confluence · Docs-as-Code
 - GitHub · Visual Studio Code
 - API Documentation (Postman, REST, endpoints, parameters)
 - Draw.io · LucidChart · Microsoft Suite · Canva
- **Automation & Web**
 - Python · GitHub Actions
 - HTML · CSS · JavaScript
 - Zapier · Apollo · Clay · Apify
 - Markdown · YAML
- **Domain Knowledge**
 - Cloud Infrastructure: Multi-cloud Networking, Azure VNets, Load Balancing, AWS, GCP
 - Networking: TCP/IP, IPv4/IPv6, Routing & Switching, DNS, DHCP, Subnetting
 - AI & Documentation: Knowledge Graphs (Neo4j), LLMs, AI-assisted workflows
